

MUNICIPAL FOCUS

The Voice of Municipal Administrators

OCTOBER 2013

WEBINAR

Federal Wastewater Systems Effluent Regulations

On behalf of PMA, Environment Canada will be hosting a webinar on Tuesday, Nov. 19 @ 1:30 pm.

The purpose of this webinar is to provide information for our membership on the Federal Wastewater Systems Effluent Regulations (WSER) and the basics for complying.

This webinar is FREE of charge and is expected to run approximately 2 hours. Participants will require a computer with high-speed Internet access, as well as a telephone. The visual part of the presentation will be through the Internet, and the audio portion by telephone. A toll-free teleconference number and an Internet sign-in link will be provided to you.

Tentatively, we see the webinar beginning with a presentation on the WSER basics, with time for participants to ask questions throughout. The teleconference will be moderated, with an up-front explanation of how the webinar will work, and questions will be answered first come, first served.

In order to determine the number of participants, please email PMA your name, title, town, and population size. This information will assist in ensuring the presentation is geared towards the appropriate audience.

Again, please contact the PMA office if you plan to participate. This is very important. Email to: ex.dir@nlama.ca
